Proposed elements for inclusion in the report of the Preparatory Committee on its first session

As noted in the report of Main Committee III of the Review and Extension Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons, which was adopted by consensus, there have been exceptional instances in which serious environmental consequences have resulted from uranium mining and associated nuclear fuel-cycle activities in the production of nuclear weapons. The Preparatory Committee reiterates the 1995 Conference's call upon all Governments and international organizations that have expertise in the field of clean-up and disposal of radioactive contaminants to consider giving appropriate assistance as may be requested for remedial purposes in those affected areas.
